

CameraView MFD

CameraMFD alters your camera position. You may be in the generic cockpit (2 MFDs & hud) or VC (virtual cockpit) to use this utility. This mod is disabled in 2D panel mode.

All the controls are on the MFD, but can also be used by the keyboard.

- RightShift-1 Move-Up
- RightShift-2 Move-Down
- RightShift-3 Move-Left
- RightShift-4 Move-Right
- RightShift-5 Move-Forward
- RightShift-6 Move Backward
- RightShift-7 Reverse-View (Switch Front/Back view)
- RightShift-8 Reset-View (does not reset Reverse-View)
