

EGNV (Durham Tees Valley)

for Orbiter Spaceflight Simulator

EGNV is a small international airport in County Durham, northeast England, about 16km southwest of Middlesbrough.

An aerial view of Durham Tees Valley Airport.

Coordinates: 54.509°N, 1.429°W.

Runway 05/23: true heading 48° and 228°; length 2288m (between thresholds 2278m); width 45m; ILS 108.5MHz; PAPI 3° (290m from thresholds); asphalt surface.

Deltaglider-Ss on runway 23.

Installation

Decompress the zip package into the root folder of your Orbiter installation. This base addon is a dependency of the *Configurable Runway System* addon, and this must be downloaded and installed otherwise you will see only grey strips for the runways.

You'll find take-off and final approach scenarios for EGNV for the Deltaglider-S.

Created 17th October 2012, using Configurable Runway System, Orbiter Base Maker (with Google Maps), Wordpad, Notepad and Open Office.
