

Skylab1973 v2.1

Operations Manual

*September 2008
by
Scott Conklin (Usonian)*

Version 2.1 is identical to v2.0, except for the addition of a second set of Skylab mesh and config files. This second set of Skylab files has the docking ports and targets relocated to align with the AMSO Command Module docking reticule. See screen shot above.

In all other respects, Version 2.1 is complete and identical to Version 2.0.
