

STPSP: ANDOR

Introduction

STPSP: Andor is part one of the *Star Trek* Planetary Systems Project (STPSP). This is an attempt to accurately portray the major planetary systems in the *Star Trek* universe (with some conjecture, mostly in the form of some ideas of mine.) A fan of the series almost since birth, I wanted to recreate the planetary systems so that it would be possible to create scenarios in them. The Andor system is home to two planets, one moon and two surface bases. You will require the Trek Pack, STPSP: Bajor, *Kumari*-class Andorian cruiser, *USS Equinox*, and Type 9 Shuttlecraft for some of the scenarios. In addition, some of the bases requires the Frontier 55 Cancri and Galileo Station add-ons for meshes. As for this system, I promise that you won't be disappointed. Enjoy!

The System

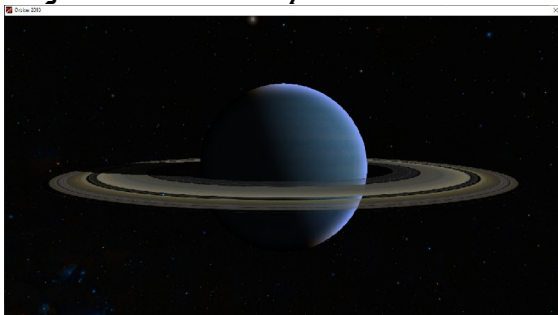

System viewed from 11 AUs

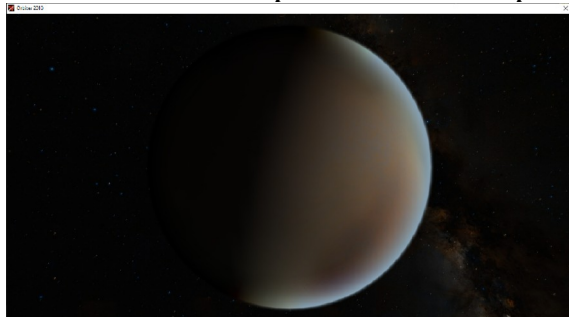

(Note: there are actually supposed be more planets in this system than shown.)

Primary Star: Procyon (Class F5IV-V)

Eighth Planet: Procyon VIII AKA Andor Prime (Class-I, one moon)

Tenth Planet: Procyon X AKA Weytahn (Class-L)

The Andorians

The Andorians are a humanoid species characterized by blue skin, white hair, and a pair of bi-radial antennae on their heads. We actually don't know much about the Andorians, apart from the fact that they inhabit a frozen moon of a large gas giant and are a violent, passionate people. Despite some border conflicts with the Vulcans prior to its founding, the Andorians are an important member of the United Federation of Planets, and in fact were one of the founding members alongside the Vulcans and Tellarites.

Notable Andorians:

Thy'lek Shran (👤👤👤 🏠🏠 🏠🏠🏠🏠🏠): Commander of the *Kumari* and friend of Captain Jonathan Archer.

Shras (🏠🏠🏠🏠🏠): Andorian Ambassador as of 2267.

Thelev (👤👤👤🏠): (Technically an Orion), spy who attempted to sabotage the Babel conference in 2267.

Shresh'kraan D'Vanas (🏠🏠🏠🏠🏠 🏠🏠🏠🏠🏠🏠 🏠🏠 🏠🏠🏠🏠🏠): Captain of USS *Enterprise* as of 2448. (From my fanfiction.)
