

STPSP: ROMULUS

Introduction

STPSP: Romulus is part six of the *Star Trek* Planetary Systems Project (STPSP), an attempt to accurately simulate the major planetary systems in the *Star Trek* universe (with some conjecture, mostly in the form of some ideas of mine.) A fan of the series almost since birth, I wanted to recreate the systems so that it would be possible to create scenarios in them. The Romulus system is home to four planets, three moons, and three surface bases. The planetary arrangement is based on a chart seen in the film *Star Trek: Nemesis*. One of the surface bases requires the Frontier: 55 Cancrri addon for meshes. Additionally, some of the scenarios require the Type 9 shuttlecraft, Klingon Fleet, STPSP: Q'ono'S, D'Deridex-class Romulan Warbird (Trekkie's version), Mogai-class (AKA Valdore-class) Romulan Warbird, and Trek Pack add-ons. As for the system, I promise that you won't be disappointed. Enjoy!

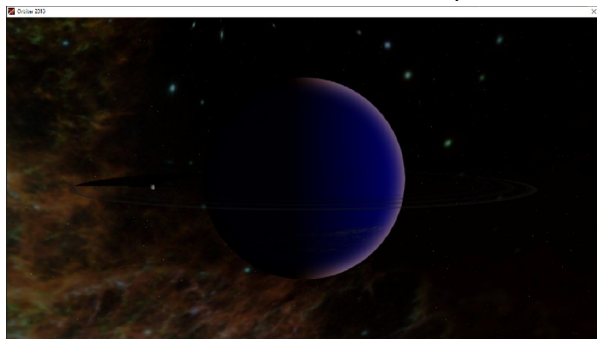

The System

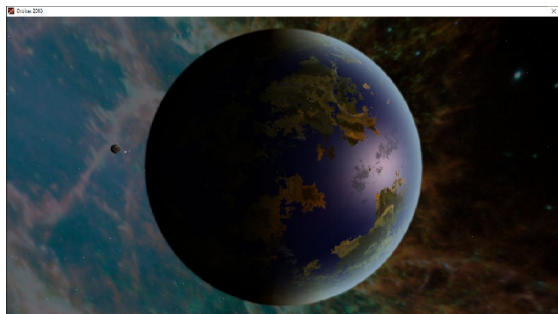

System viewed from 655 million KM

Primary Star: (Name Unknown, Class K0V)

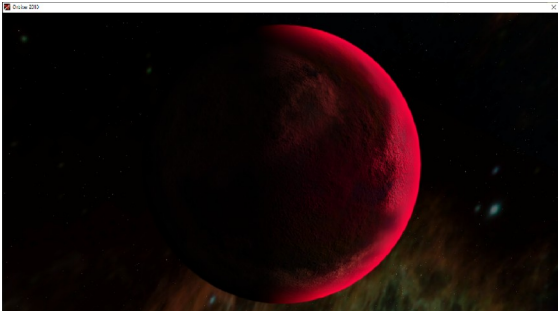

First Planet: Romulus I (Class-J, one moon)

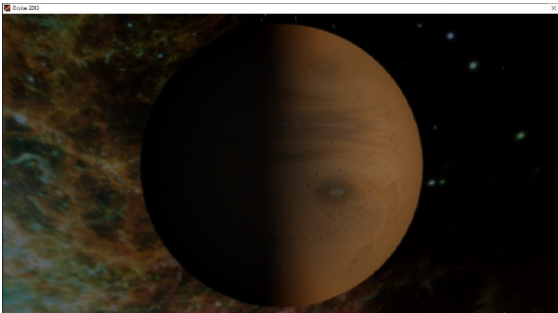

Second Planet: Romulus (Class-M, one moon)

Third Planet: Remus (Class-Q)

Fourth Planet: Romulus IV (Class-J, one moon)

The Romulans

The Romulans are a humanoid species characterized by pointed ears, green blood, and a ridge on their forehead. They are descended from Vulcans who left Vulcan in about 300 AD. Although they resemble the Vulcans, they are considerably different culturally. They have been described as being passionate and aggressive, but honourable people. The Romulan government is controlled by a Praetor, with a Senate to control most political decisions. The Romulans have had a long history of conflict with the Federation, including the Earth-Romulan War (2155 ~ 2160) and the infamous Khitomer Massacre (2346). However, during the Dominion War, the two powers officially ended hostility to fight the Dominion. Examples of Romulan cuisine include Romulan Ale (ᑭᑭᑭᑭ ᑭᑭᑭ, kali-fal), a blue-coloured alcoholic drink that was banned prior to the Dominion War, and Romulan mollusks.

Notable Romulans:

Commander Tomalak (ᑭᑭᑭᑭᑭᑭ): Notable commander of a Warbird.

Alidar Jarok (ᑭᑭᑭᑭᑭᑭ ᑭᑭᑭᑭᑭᑭ): Former admiral and alleged traitor.

Praetor Hiren (ᑭᑭᑭᑭᑭᑭ): Leader of the Romulans, assassinated in 2379.

Senator Donatra (ᑭᑭᑭᑭᑭᑭ): Senator who initially conspired with but later fought Shinzon in 2379.

Sela (ᑭᑭᑭᑭ): daughter (likely a clone) of alternate Natasha Yar.

The Remans

The Remans are a humanoid species with grey skin, bald heads, pointed ears, and long teeth. We are provided with very little information on the Remans. We know that their homeworld, Remus, is tidally locked towards its parent star and therefore suffers from extreme temperature variations. As a result, the Remans live on the dark side. Remans, up to a certain point, were severely persecuted by the Romulans. Presumably, the Remans are native to the system, thus explaining the considerable physical differences between them and the Romulans.

Notable Remans:

Shinzon (𐤑𐤆𐤆𐤑𐤍𐤕𐤔𐤕): Technically a human clone (though raised by Remans), as well as a traitor, who attempted to commit genocide against Earth in 2379.
